

Integrated Amplifier **A-S801**

A Giant Step

With an internal design based on Yamaha's high sound quality ToP-ART circuitry, as well as a double-bottom chassis and strictly selected parts, The A-S801 provides outstanding musical expressiveness. Using the DSD5.6MHz and PCM384kHz/32*bit compatible USB DAC and the latest 32bit ESS DAC, it fully supports the latest high resolution sound formats. Combining HiFi sound quality and a new HiFi style, the A-S801 represents a giant step forward in amplifier performance.

* Windows support. Mac support is 24-bit.
