

DesignMax DM5P

pendant loudspeaker

Product Overview

With a coaxial two-way design, the 60-watt DesignMax DM5P loudspeaker offers rich lows and clear, intelligible highs — along with premium aesthetics that complement any commercial sound installation. The DM5P pendant loudspeaker features a coaxial 5.25-inch woofer and 1-inch tweeter mounted within the Dispersion Alignment system, delivering a frequency range of 65 Hz – 20 kHz. The DM5P features a recessed single-point suspension system for a sleek, attractive appearance. All models are available in black or white.

Key Features

Complete any commercial sound installation with 16 DesignMax loudspeakers to mix and match, including in-ceiling, surface-mount, and pendant form factors, subwoofers, high-SPL compression-driver models, compact low-profile models, and outdoor-rated options

Choose from three DM5 models — the in-ceiling DM5C, the surface-mounted, outdoor-rated DM5SE, and the sleek DM5P pendant loudspeaker

Deliver rich lows and clear, intelligible highs with a coaxial two-way design — no DSP or EQ required. For even better sound, combine with select Bose Professional DSPs and amplifiers to enable Bose Professional loudspeaker EQ and SmartBass processing, which expands performance and response at any listening level

Ensure a consistent listening experience throughout the room with the Dispersion Alignment system, which matches the coverage of the woofer to the pattern of the tweeter

Blend with any room design with elegant form factors, minimum-bezel grilles available in black or white, and removable logos

Install easily with industry-standard accessories — all models include Euroblock connectors; in-ceiling models include plenum-rated backcans, tile bridges, and front-access audio wiring that makes installation and troubleshooting easier

Provide an open, attractive aesthetic with pendant loudspeakers featuring a recessed single-point suspension system that keeps hardware out of sight and can be used to hold and hide a service loop for easy access

Footnotes

1. Frequency response and range measured on-axis in whole-space environment with recommended EQ voicing.
2. Sensitivity measured on-axis in whole-space environment averaged 100 Hz – 10 kHz using recommended high-pass protection.
3. Maximum SPL calculated from sensitivity and power handling specifications, exclusive of power compression.
4. AES standard 2-hour duration with IEC system noise.
5. Bose Professional extended-lifecycle test using pink noise filtered to meet IEC268-5, 6-dB crest factor, 500-hour duration.
6. Choose a paint that is specifically designed for use with polypropylene (PP) plastics.
